

Tahreem Fatima *Software Engineer*

✉ tahreemf274@gmail.com ☎ 0321 9444472 📍 Lahore, Pakistan

PROFILE

Software Engineering undergraduate with strong foundations in full-stack web development, UI/UX Design, software architecture, and quality engineering. Experienced in building scalable systems using ASP.NET Core, microservices, and modern testing tools, with hands-on exposure to automation, security, and performance testing. Passionate about designing reliable, maintainable software and continuously learning new technologies.

EDUCATION

Punjab University College of Information and Technology, 2027
Bachelors of Science in Software Engineering
Expected Graduation CGPA: 3.74/4.00

Punjab Group of Colleges, FSC Pre Medical 2021 – 2023
999/1100

TECHNICAL SKILLS

Languages and Frameworks

C, C++, C#, Python, SQL (Oracle), JavaScript, HTML, CSS, Bootstrap, ADO.NET, ASP.NET Core Web API, Microservices, RESTful APIs, MVC, Kotlin, Blazor, Rabbit MQ

Software Engineering Skills

Full-stack web development (.NET), Android app Development, MVC & microservices integration, SPA (Blazor), software design patterns (GoF, and GRASP), architectural patterns (event-driven, high cohesion), database design, Design and analysis of Algorithms, Computer Networks, Calculus, machine learning fundamentals (time series, k-means, neural networks), Theory of Automata, Software Quality Engineering, security testing, deployment strategies.

Tools

Figma, Canva, Docker, Selenium, PostMan, JMeter, Cypress, SonarQube, OWASP ZAP, Vale, RedPen, Jira, Infinity, MS Project

Soft Skills

Leadership, Communication, Teamwork, Problem Solving, Critical Thinking, Time Management and Accountability

PROJECTS

Hijama Clinic Appointment Booking System,

(ASP.NET Core MVC | Entity Framework Core | SQL Server | Identity | SignalR)

Developed a full-stack web application for managing Hijama (cupping therapy) clinic appointments with secure authentication, role-based and resource-based authorization, and real-time notifications.

The system allows patients to book appointments online, track booking status, and receive instant updates, while administrators can manage bookings, approve or reject requests, and monitor real-time dashboard statistics without page reloads.

Software Quality Engineering Project - Doccano Testing & Automation,

(Docker, Selenium, Postman, JMeter, OWASP ZAP, SonarQube)

Implemented end-to-end software quality assurance on an open-source web application (Doccano). Deployed the application using Docker, performed UI automation testing with Selenium, API testing using Postman, performance and load testing with JMeter, security vulnerability scanning using OWASP ZAP, and code quality analysis with SonarQube. Documented test cases, execution reports, performance metrics, and security findings following SQE best practices.

Human Activity Recognition using Machine Learning & Deep Learning,

(Python, Scikit-learn, TensorFlow/Keras, NumPy, Pandas, Matplotlib)

Developed a Human Activity Recognition (HAR) system using the UCI HAR dataset with smartphone accelerometer and gyroscope data. Implemented classical ML models (Logistic Regression, SVM, Naive Bayes, Random Forest) using engineered features and deep learning models (FCNN, Simple RNN, LSTM, GRU) on raw time-series data. Compared feature-based and sequence-based approaches, achieving highest performance with Random Forest and FCNN, while GRU performed best among RNN models. Evaluated models using accuracy, F1-score, and confusion matrices to analyze activity classification performance.

CERTIFICATES AND ACHIEVEMENTS

Certificate of Participation

Code Fest 4.0 at PUCIT

Certificate of Participation

Code Bees 2.0 ,Secured
4th Position AT PUCIT

Certificate of Participation

SOFTEC Programming
Competetion at FAST

Campus Ambassador
Softronix 4.0 GCU

Certificate of Participation

SOFTEC UI/UX Design
Competition

EXPERIENCE

Teaching Assistant-Machine Learning, PUCIT

01/2026 – 05/2026

Assisted the professor in conducting Machine Learning labs, evaluating student quizzes and assignments, and reviewing projects. Supported students during practical sessions by helping them understand ML concepts, algorithms, and implementation techniques. Participated in grading, performance assessment, and maintaining academic records.

Teaching Assistant-ICT, PUCIT

09/2025 – 01/2026

Assisted the professor in conducting lab sessions, evaluating quizzes, and managing class activities for a group of 50+ students, providing academic support and ensuring smooth course operations.

Developed strong skills in **communication, mentoring, and classroom management** through regular student interaction
